What Is Accounting Shared Services?

Accounting Shared Services is an operating model in which an independent shared services organization performs services, typically transaction processing, on behalf of customer organizations while maintaining agreed-upon service levels.

The primary purpose of an accounting shared services operating model is to reduce duplicate effort, enable staff to focus on the core mission of their agency and provide a high level of service.

TRANSACTIONS

A Customer's Experience

How is your experience with Shared Service thus far?

"Utilizing Shared Services has been a very good experience thus far. Their staff of knowledgeable, experienced accounting professionals have eased our anxiety in not having a full-time accountant. From the beginning they scheduled several initial meetings to familiarize themselves with our staff and to learn more about how our organization operates and our critical needs. They've assisted us in understanding how purchase orders, vendor management, accountability of expenditures and budget management works. They explained and have assisted us in implementing several best practices that have both simplified accounting and have created more checks and balances. It has been both a learning curve and a relatively quick transition with Shared Services taking on a lot of our accounting obligations and responsibilities.

"Overall, I enjoy working with the Shared Services team as each member brings something entirely new to us and, most importantly, they take the time to teach us and to explain the reasoning behind their approach. The bi-weekly touchpoint meetings between accounting shared services and GDVS are very helpful and is a great opportunity to review polices and to talk amongst us, to find out as a "team" what we are doing well and what we can improve upon. I think GDVS will benefit in the long term (and not a quick fix) in utilizing accounting shared services. We look forward to maintaining a partnership with accounting shared services for the foreseeable future."
